

Aniket | Entry Level Data Science

+91-8295476005 bytealche@email.com , Bahadurgarh, Haryana -124507

Professional Summary

Engaged in comprehensive EDA for ML projects, leveraging Python (NumPy, Pandas, Matplotlib, Scikit) for deep data exploration, visualization, and statistical analysis. Proficient in preprocessing, feature engineering, model training, validation, and optimization. Expert in resolving inventory issues, interpreting workflows for data-driven decisions, and tracking & troubleshooting with Excel. Skilled in preparing merchandise for logistics, tracking inventory, and conducting audits for accurate records.

Core Competencies

-Data Analysis

-Database
Management

-Data Analytics

-Data Visualization

Education

Master of Science
Informatics (currently)

Institute of Informatics & Communication
University of Delhi

Bachelor of Science
Electronics

Deen Dayal Upadhyaya College, Delhi
University Of Delhi

Intermediate(12th)
Science

Jawahar Navodaya Vidyalaya, Kaloi
Jhajjar, Haryana

Matriculation(10th)

Jawahar Navodaya Vidyalaya, Kaloi
Jhajjar, Haryana

Skills

Programming: Python (NumPy, Pandas, SciPy, Stats,), R(Basics), SQL (MySQL)

Data Visualizations & BI Tools: Seaborn, Matplotlib, Microsoft Power BI, Tableau, Microsoft Excel

Other Tools: Git, Jupyter Notebook, Collab, Microsoft Word, Microsoft PowerPoint, JavaScript, C++, HTML, CSS, flutter

Projects

Movie Recommender System

- Developed a content-based movie recommendation system using Python and Pandas.
- Engineered feature extraction from movie metadata (genre, director, cast) to compute similarity scores.
- Implemented cosine similarity for recommending top-N similar movies to users.
- Built a simple web interface using Django for real-time movie recommendations.

Data Warehouse Development

- Designed and implemented an ETL pipeline for structured data integration using **Medallion Architecture**.
- Developed **data modelling** strategies to enhance query efficiency and reporting accuracy.
- Standardized **naming conventions** and optimized table structures for business intelligence applications.
- Built a scalable data warehouse to support cross-platform analytics and decision-making.
